```

first webpage</span></p>
        <p class="bigtext">MYSITE.COM <br><span class="slogan">This is my
        </td>
    </tr>
    <tr>
        <td colspan="3" class="nav">
            <span class="navtext">HOME</span>
            <span class="navtext">ABOUT US</span>
            <span class="navtext">OUR SERVICES</span>
            <span class="navtext">CONTACT</span>
        </td>
    </tr>
    <tr>
        <td rowspan="3" id="firstsidebar">
            <p>Some long text is here Some long text is here Some long text is
            <p>Some long text is here</p>
        </td>
        <td colspan="2" class="main">main heading here</td>
    </tr>
    <tr>
        <td colspan="2" class="subtext">
            Whoever is looking for a quick start of his online project, these
            free simple HTML templates are the perfect tool to start with.
        </td>
    </tr>
    <tr>
        <td rowspan="2">
            No need to look further if the minimalist look is what you are
            after. Sometimes, keeping it simple is the way to go. No clutter, no distractions. Just straight
            forward incredible content which helps you attract new visitors to your site. In case you plan to
            promote your work and services, this is a perfect method for scaling up your business. An online
            presence built to perfection.
        </td>
        <td rowspan="2">
            The fantastic collection of free HTML templates speed up your web
            design procedure and ensure excellent results. With a ready-to-use website template, you can have
            a fully functional website ready quickly.
            And even if you are a newbie, you can still achieve the same
            levels of professionalism. However, having the pure basics of HTML and CSS comes very helpful.
        </td>
    </tr>
